

## SHAFTS AND CAM SECTIONS

At Contango, we can offer OEM compressor parts and components in a more timely manner than our competitors.

With international partner, We supply a variety of cam configurations, including single cams, cam lobe sections, master shafts, and camshafts. Our production envelope can accommodate sizes from two inches long to segmented camshafts up to 40 feet long, and lobe and main journal diameters up to 15 inches.

### Remanufactured & Reground Camshafts

Remanufactures camshafts and cam followers for almost every industrial engine application, including natural gas compression and transmission, stationary power, and marine propulsion. We are pleased to offer production capabilities that can accommodate customer requirements that range from a one-off specialty piece with ISO level documentation and full SPC capabilities at the workstation level to high volume, less measurement intensive products. We ensure that the original design features are maintained or improved upon during the remanufacturing process.

### Features & Benefits

Specifically developed for the toughest conditions in key areas of your compressor

- ✓ Highest Performance Materials were developed for highly complex applications under the most challenging conditions.
- ✓ Applications for this machine include checking linear spacing.
- ✓ Field services.
- ✓ Engineering & design.
